C115/C115T
Surface-mount loudspeaker

features
- 5" (125mm) ICT™ transducer
- Weather resistant enclosure and transducer
- Versatile mounting arrangement

applications
- Retail outlets
- Hotels, bars and restaurants
- Health clubs
- Theme parks

The elegant surface-mount C115 loudspeaker is ideal for reproducing both speech and background music in a distributed sound system. Its unobtrusive, lightweight polypropylene injection-moulded enclosure withstands most weather conditions and protects the weather-resistant drive unit in exposed locations.

Features include wide bandwidth and high output capability from a two-way, 5" ICT™ drive unit. Patented ICT™ (Inductively Coupled Transducer) high frequency technology avoids the tweeter voice coil burn-out so often found in background music systems.

A versatile, integral bracket permits close coupling to the wall and 40° horizontal / 35° vertical off-axis adjustment. Non-intrusive corner mounting and array options provide the flexibility for optimum siting in any particular architectural environment.

The C115 is available in low impedance electrical or line transformer configuration - the latter being easily switched between tappings by use of a screwdriver.

The C115 and C516 share similar sound characteristics, allowing flush and surface mount loudspeaker systems to make use of the same control electronics when specifying a system.

Surface-mount loudspeaker

Overall dimensions:
- Width: 194mm [7.64”]
- Height: 135mm [5.31”]
- Depth: 217mm [8.52”]
- MIN. BRACKET FIXING FOOTPRINT: 150mm [5.92”]
- MAX. BRACKET FIXING FOOTPRINT: 180mm [7.09”]
- TILT: 60°

### Architectural and Engineering Specifications

The loudspeaker system shall be of the two-way passive type consisting of one 5" (125mm) ICT™ driver with a concentric high frequency diaphragm loaded by a phase plug and waveguide housed in a vented polypropylene enclosure.

Performance of the loudspeaker system shall meet or exceed the following criteria:
- Frequency response measured 1 metre on axis shall be 120Hz-20kHz ±3dB.
- High frequency dispersion at -6dB points shall be 90°H x 90°V.
- Power handling shall be 50W AES, 200W peak.
- Rated impedance shall be 8 ohms.
- Maximum SPL measured at 1 metre on axis shall be 105dB continuous, 111dB peak.
- Dimensions (W) 194mm x (H) 217mm x (D) 135mm (7.6ins x 8.5ins x 5.3ins).
- Weight 1.7kg (3.7lbs).

The loudspeaker system shall be the Martin Audio CI15.

---

### Accessories

- HTKC1151 Single Corner Bracket
- HTKC1152 Twin Bracket

---

**Notes**

(1) Measured on-axis in half space at 2 metres, then referred to 1 metre.
(3) Measured in half space conditions at 2 metres with 1 watt input, using band limited pink noise, then referred to 1 metre.
(4) Measured in half space conditions at 2 metres using band limited pink noise, then referred to 1 metre.

---

**Trade Descriptions Act**

Due to Martin Audio’s policy of continuing improvement, we reserve the right to alter these specifications without prior notice.

Martin Audio is committed to refining state of the art sound reinforcement, combining in-depth product and field applications research with advanced manufacturing techniques. Every Martin Audio product is built to the highest manufacturing standards and rigorously tested to ensure that it meets the performance criteria specified in the design.
