CSX112
Compact Subwoofer

Features
- Compact, direct-radiator subwoofer
- 12” (300mm) driver with 3” (75mm) voice coil
- High efficiency 102dB/1W/1m half-space
- Water resistant cone
- Ultra-compact, architecturally-friendly enclosure
- Large ports for reduced air noise
- Perforated steel grille
- Black or white standard colour options
- Integrated flying points

Applications
- Live music clubs and bars
- Nightclubs
- Bars and restaurants
- Museums and AV spaces
- Convention centres
- Hotels
- Retail outlets
- Leisure centres
- Houses of Worship

The CSX112 is an ultra-compact direct radiating sub-bass system designed to extend the bandwidth and increase the headroom of CDD full-range models from the CDD5 to the CDD10. It features a very efficient 12” (300mm) long-throw bass driver with a high power 3” (75mm) voice coil and generously-sized reflex ports for low noise, high power operation.

With a response of 48Hz-150Hz ± 3dB, the ultra-compact size of the CSX112 makes it an ideal partner for CDD Series systems where space is at a premium or where the subwoofers need to be hidden. The enclosure is constructed from high-density MDF and has an impact-resistant finish, while the driver is protected by a rigid perforated steel grille, which is pre-curved to withstand physical damage.

Finished in black (RAL9005) or white (RAL9016) as standard with integrated flying points, the CSX(number) can be also be supplied in any RAL colour to order.

When used with CDD full-range systems, crossover and EQ functions can either be performed by the DX0.5 and DX4.0 system controllers, or by an iKON amplifier.
## Technical Specifications

### Acoustical

<table>

### Notes

1. Measured on-axis in half (2pi) space at 2 metres, then referred to 1 metre.
3. Measured in half (2pi) space at 2 metres with 1 watt input, using band limited pink noise, then referred to 1 metre.
4. Measured in half (2pi) space at 2 metres using band limited pink noise, then referred to 1 metre.
5. Measured on-axis in open (4pi) space at 2 metres, then referred to 1 metre.
6. Measured in open (4pi) space at 2 metres with 1 watt input, using band limited pink noise, then referred to 1 metre.
7. Measured in open (4pi) space at 2 metres using band limited pink noise, then referred to 1 metre.
8. Measured in open (4pi) space at 2 metres with 2.83V input, using band limited pink noise, then referred to 1 metre.
9. Calculated at 1 metre.
10. Measured in half (2pi) space at 2 metres with 2.83V input, using band limited pink noise, then referred to 1 metre.

### Trade Descriptions Act

Due to Martin Audio’s policy of continuing improvement, we reserve the right to alter these specifications without prior notice. Martin Audio is committed to refreshing state of the art sound reinforcement, combining in-depth product and field applications research with advanced manufacturing techniques. Every Martin Audio product is built to the highest manufacturing standards and rigorously tested to ensure that it meets the performance criteria specified in the design.
