EM15/EM15T

Ultra-compact trapezoid enclosure

features
- Ultra-compact trapezoid enclosure
- ICT™ Technology
- Vertical or horizontal orientation
- High SPL capability

applications
- Background music for clubs and bars
- Theatre delay/in-fill
- AV presentations

The remarkable, miniature EM15 full-range system features twin 5" drivers in a two-way configuration utilising ICT™ (Inductively Coupled Transducer) technology. Energising the HF diaphragm by induction is the effective alternative to a voice coil, avoiding the burn-out which commonly causes failure in other background music systems. Designed for background use, complementing an intimate restaurant atmosphere, for example, the unusually high output of the EM15 is also frequently used to good effect for infill in theatres, clubs and bars.

technical specifications

The loudspeaker system shall be of the two-way passive type consisting of one 5" (125mm) direct radiating bass/mid frequency driver and one 5" (125mm) full-range ICT™ driver with a concentric high frequency diaphragm, loaded by a phase plug and waveguide. The transducers shall be mounted in a reflex loaded trapezoidal enclosure fitted with threaded inserts for wall and ceiling mounting.

Performance of the loudspeaker system with its electronic controller shall meet or exceed the following criteria:

- Frequency response measured 1 metre on axis shall be 120Hz-20kHz ±3dB.
- High frequency dispersion at -6dB points shall be 80˚H x 80˚V.
- Power handling shall be 75W AES, 300W peak.
- Rated impedance shall be 4 ohms (16 ohms optional/user configurable).
- Maximum SPL measured at 1 metre on axis shall be 108dB continuous, 114dB peak.
- Dimensions (W) 172mm x (H) 282mm x (D) 172mm (6.8ins x 11ins x 6.8ins).
- Weight 5kg (11lbs).

The loudspeaker system shall be the Martin Audio EM15.

accessories

- HTKEM010 Flying Yoke (supplied in pairs)
- HTKEM011 Wall Bracket – Grey/Green (supplied in pairs)
- HTKEM013 Wall Bracket – White (supplied in pairs)
- HTKEM014 Wall Bracket – Black (supplied in pairs)

Notes

(1) Measured on-axis in half space at 2 metres, then referred to 1 metre.
(3) Measured in half space conditions at 2 metres with 1 watt input, using band limited pink noise, then referred to 1 metre.
(4) Measured in half space conditions at 2 metres using band limited pink noise, then referred to 1 metre.

Trade Descriptions Act

Due to Martin Audio's policy of continuing improvement, we reserve the right to alter these specifications without prior notice. Martin Audio is committed to refining the art of sound reinforcement, combining in-depth product and field applications research with advanced manufacturing techniques. Every Martin Audio product is built to the highest manufacturing standards and rigorously tested to ensure that it meets the performance criteria specified in the design.
