

DISPLAY 2 and Ryzen Based CPUs

We are aware of some compatibility issues between DISPLAY 2 and Ryzen based CPUs

We have a patch that fixes this.

Please download and unzip the file and then add to the folder below. If it isn't added to that folder D2 will not run correctly

C:\Program Files\Martin Audio\Display2_3_4_b1\application

To run DISPLAY 2 without any issues you need to start the application by double clicking on the .bat file (which is the file included in the start.zip)

If you have any queries, please contact technical@martin-audio.com
