

VU-NET 2.2.2 Release Notes – 29/09/2021

The latest release of VU-NET implements new features for iKON amplifiers, as well as some general updates to the VU-NET Software.

Note – a Firmware upgrade to iKON is required for use with VU-NET 2.2.2. Latest firmware revision is **1.592**

Factory Presets (iKON)

- TORUS T12 support – please see TORUS user guide for details on use with VU-NET.
- SXC118 with TORUS T12 preset added
- HPF added to CDD12 & CDD15 full-range presets

Bug Fixes

- Ganging error with THV/THH presets
- WPL emergency default increased to 24 cabinets per array
- Output polarity button removed from ganging matrix
- Fixed DSP Input PEQ shows blank when Hardman HPF is selected via front panel
